“a luminance distribution totaling unit for totaling the luminance equivalent of each picture element on the basis of these picture data;

a luminance correspondence setting unit for setting a correspondence relationship for collective accomplishment of conversion so that, while converting the pertinent luminance distribution on the basis of output of the luminance distribution totaling unit, relative proportions among element colors be adjusted to prescribed values correspondingly to luminance values after luminance conversion; and

a picture data conversion unit for generating monotone picture data in which the luminance of each picture element in said picture data is converted on the basis of this set correspondence relationship”, as claimed in claim 1.

In regard to claims 6-15, the prior art does not disclose the combination of limitations of the claimed invention, specifically the limitations of:
